

TEMPLE STEPHEN

Junior AWS Cloud / DevOps Engineer

Lagos, Nigeria | [+234 807 086 9528](tel:+2348070869528) | temple.stephen100@gmail.com | [GitHub](#) | [Credly](#) | [AWS Skill Builder](#)

PROFESSIONAL SUMMARY

Practical, security-focused AWS Certified Solutions Architect – Associate and AWS Certified Cloud Practitioner transitioning into cloud and DevOps engineering. Through hands-on projects, I have designed secure AWS environments, automated deployments, configured IAM access controls, built serverless workflows, and used Amazon CloudWatch for monitoring and troubleshooting. I am comfortable working with AWS, Linux, Git, GitHub Actions, AWS CLI, Python, and Boto3, and I bring a strong security mindset to every cloud environment I build. I am currently pursuing a B.Sc. in Cyber Security and seeking a Junior AWS Cloud or DevOps Engineer role where I can contribute practical technical skills, learn from experienced engineers, and support secure, reliable, and well-documented infrastructure.

TECHNICAL SKILLS

AWS Cloud Services: Amazon EC2 | Amazon S3 | AWS IAM | Amazon VPC | AWS Lambda | Amazon Route 53 | Amazon CloudFront | Amazon CloudWatch | AWS CLI

Cloud Architecture: Multi-Tier Architecture | Public and Private Subnets | High Availability | Scalability | Cost Optimization | Disaster Recovery Fundamentals | AWS Well-Architected Framework

DevOps and CI/CD: Git | GitHub | GitHub Actions | CI/CD Pipelines | Automated Deployment | Version Control | Release Workflow Fundamentals

Infrastructure as Code and Containers: Terraform Fundamentals | AWS CloudFormation Fundamentals | Infrastructure as Code Concepts | Docker Fundamentals

Cloud Networking: TCP/IP | DNS | Subnetting | Route Tables | Internet Gateways | Security Groups | VPC Endpoints | Network Segmentation

Cloud Security: IAM Users, Groups and Roles | IAM Policies | Role-Based Access Control | Least Privilege | Separation of Duties | Access Control | Workload Isolation

Scripting and Web Technologies: Python | Boto3 | HTML | CSS | JavaScript

Systems and Cloud Operations: Linux Ubuntu | Linux Command Line | Windows Administration | Cloud Monitoring | Log Analysis | Troubleshooting | Incident Response Fundamentals

Engineering Practices: Architecture Documentation | Technical Procedures | README Documentation | Configuration Management

CLOUD ENGINEERING EXPERIENCE

Cloud Engineering Labs & Personal Cloud Projects - *Self-Directed, Remote* Jan. 2026 - Present

- Completed and documented 8 hands-on AWS projects spanning VPC networking, IAM security, Amazon S3 hosting, serverless computing, monitoring, architecture assessment, and Git-based deployment, building practical experience aligned with Junior AWS Cloud and DevOps responsibilities.
- Designed, configured, and tested cloud environments using 8 AWS services and tools, including Amazon EC2, S3, IAM, VPC, Route 53, CloudFront, CloudWatch, and AWS CLI, converting technical requirements into functional cloud configurations.
- Secured AWS environments using least-privilege IAM policies, role-based access control, security groups, private subnets, and network segmentation, reducing unnecessary access paths and improving workload isolation.
- Assessed multiple AWS architecture scenarios against all 6 pillars of the AWS Well-Architected Framework, identified security, reliability, performance, operational, sustainability, and cost gaps, and documented prioritized remediation actions.
- Managed source code, deployment files, infrastructure notes, and configuration changes through Git and GitHub, creating traceable project histories and repeatable engineering workflows.
- Produced architecture diagrams, README files, IAM policy templates, technical procedures, and decision records for completed projects, improving configuration reproducibility, troubleshooting, and knowledge transfer.

SELECTED CLOUD PROJECTS

Home Energy Monitoring Dashboard

AWS Lambda, Amazon S3, HTML, CSS, JavaScript

- Designed a serverless home energy monitoring solution using Amazon S3 for static website hosting and AWS Lambda for backend processing, removing the need to maintain a continuously running web server.
- Built and integrated the frontend and backend components, creating a scalable architecture that supports browser-based energy-data presentation and future integration with APIs or monitoring devices.

Serverless Image Processing Pipeline

AWS Lambda, Amazon S3, IAM, CloudWatch, Python (Boto3)

- Developed an event-driven image-processing pipeline that automatically invoked AWS Lambda when an image was uploaded to Amazon S3, eliminating the need to start processing tasks manually.
- Configured Python and Boto3 processing logic, least-privilege IAM permissions, and CloudWatch logging to automate file handling, restrict resource access, and provide execution and error visibility.

AWS Static Website with CI/CD

Amazon S3, GitHub Actions, Git, HTML, CSS, JavaScript

- Deployed a static website on Amazon S3 and created a GitHub Actions CI/CD workflow that automatically published approved repository changes to the hosting bucket.
- Managed source code, workflow files, and deployment history through Git and GitHub, replacing manual file uploads with a consistent and traceable deployment process.

AWS IAM Security & Access Control

Technologies: AWS IAM | Users | Groups | Roles | Policies | RBAC | Least Privilege

- Designed an IAM framework using users, groups, roles, and fine-grained policies to address over-permissioned access and align privileges with defined responsibilities.
- Implemented role-based access control and separation of duties, then created reusable IAM policy templates and access-decision records to improve consistency across future deployments.

EDUCATION

Bachelor of Science (B.Sc.) - Cyber Security - Miva Open University, Yaba, Nigeria

May 2025 - Present

Relevant coursework: Network Security | Cloud Security | Information Security | Risk Management

CERTIFICATIONS & AWS TRAINING

AWS Certified Solutions Architect - Associate (SAA-C03)

Amazon Web Services | Resilient, secure, high-performing, and cost-optimized AWS architecture

AWS Certified Cloud Practitioner

Amazon Web Services | AWS cloud concepts, services, security, pricing, and architecture

AWS Well-Architected Proficient Badge

Amazon Web Services | Application of the six AWS Well-Architected Framework pillars

Fundamentals of Architecting on AWS

AWS Training & Certification | Completed Apr. 11, 2026

AWS Cloud Practitioner Essentials

Amazon Web Services via Coursera | Completed Mar. 23, 2026

ADDITIONAL AWS DIGITAL BADGES

- AWS Skill Builder: AWS Well-Architected Foundations | Fundamentals of Architecting on AWS | Exam Prep - AWS Certified Solutions Architect - Associate (SAA-C03)
- AWS Educate: Cloud Computing 101 | Introduction to Generative AI | Machine Learning Foundations
